- (2) For the purposes of this Bylaw, a bare land condominium plan is a plan of subdivision.

8.4 BUILDING HEIGHT

- (1) If the height of a building is required to be measured or determined, it shall be measured by calculating the average vertical distance between the natural grade, or the average natural grade in the case of a sloping grade, and the highest point of the building as determined under Subsection (2).
- (2) In determining the highest points of a building, the following structures shall not be considered to be part of the building: an elevator housing; mechanical housing; roof stairway entrance; ventilations; a skylight; a steeple; a smokestack; a parapet wall, or a flagpole or similar device not structurally essential to the building.

FIGURE 8.4.1 – BUILDING HEIGHT CALCULATIONS

$$\text{Height Average} = (X+Y)/2$$

8.5 CORNER AND DOUBLE FRONTING PARCELS

- (1) In all districts, a site abutting onto two streets or more shall have a front yard setback on each street in accordance with the front yard regulations of this Bylaw.
- (2) In all cases, the location of building on corner sites shall be subject to approval of the Development Authority who may, at their discretion, relax the front yard setback requirements taking into account the location of existing adjacent buildings or the permitted setback on adjacent sites where a building does not exist.
- (3) On corner parcels contiguous to a highway the Alberta Infrastructure Highway “Minimum Site Triangle” Design Guidelines shall apply.

8.6 CURB CUTS

- (1) The nearest edge of a proposed curb cut to the nearest [curb line](#) of the street intersection shall not be less than 12.0 m.
- (2) The maximum width of the curb cut shall not exceed 9.1 m in industrial districts and 6.0 m in all other districts, unless otherwise specified by the Development Authority for reasons of public safety or convenience.

8.7 DESIGN, CHARACTER AND APPEARANCE OF BUILDINGS AND STRUCTURES

- (1) The purpose of this Section is to provide the Town with controls and guidance in order to ensure that aesthetically attractive and compatible development is provided throughout the Town.
- (2) The quality of exterior treatment and design of all buildings shall be to the satisfaction of the Development Authority for permitted uses and discretionary uses.
- (3) Pursuant to Subsection (2), the Development Authority shall consider, but not be limited to the following criteria when evaluating the design, character and appearance of development proposals in all Districts.
 - (a) General Guidelines:
 - (i) The design, character and appearance of all buildings must be compatible with any other buildings existing in the vicinity unless the building is setting a new standard of design and character for the land use district or a particular location of it;
 - (ii) The design of the building or development must be consistent with the purpose and intent of the land use district in which it is located;
 - (iii) The building shall comply with any provisions of a statutory plan or architectural control guidelines adopted by Council.
 - (b) Guidelines for Commercial and Industrial Development:
 - (i) The harsh contrasts of very large or massive buildings mixed with small buildings can be softened by using similar sizes and shapes of massing elements, like roof lines, exterior design and treatment;
 - (ii) Blank, unfinished walls give a very bland appearance to the streetscape. Particular attention should be given to reduce large vacant spaces between buildings which are left open to public view;
 - (iii) Rooftop mechanical equipment should be hidden from view from public streets and from adjacent buildings;
 - (iv) Utility installations and buildings should be located in such a manner so as to be compatible with adjacent buildings and development. This may be achieved by placing utility installations within buildings wherever possible, or development utility buildings which blend into the surrounding area;
 - (v) Natural features are an important part of the urban environment and should be given a high priority in developing a site. This may be achieved by preserving existing trees wherever possible;
 - (vi) Corner sites at the intersection of major streets should be given special consideration. Sight lines for drivers and more pedestrian space are features which should be incorporated into the design of buildings on corner lots;

- (vii) Buildings should provide weather protective overhangs at outdoor pedestrian areas and at building entrances. The overhangs can be achieved through the use of cantilevers, awnings and canopies;
 - (viii) Long buildings along the street front should include a public route through the building which can be accessed by pedestrians to parking areas or simply to reduce having to walk around the building;
 - (ix) Large pedestrian areas or parcels should be designed for safety and at a pedestrian scale. The combination of landscaping and pedestrian walkway connections from the parking area to the shopping areas can act as a windbreak, slow the traffic in the parking area, and soften the harsh visual impact of large asphalt areas;
 - (x) The site illumination of commercial and industrial sites should not shine into residential windows;
 - (xi) On-site parking, loading and shipping areas are less attractive elements of a streetscape and should be hidden from public roadways by buildings, screening and landscaping;
 - (xii) Outdoor storage and garbage collection areas are generally unsightly and undesirable elements from public roadways and should be screened or hidden behind buildings. Existing storage and garbage collection areas should be screened from roadways by using berms, walls and landscaping.
- (c) Guidelines for Residential Development:
- (i) Visual privacy of internal living space and areas should be maintained in new and existing developments. The use of berms, landscaping and the orientation of the dwellings and the living space windows can improve the visual privacy between developments;
 - (ii) Identical or similar housing styles, models, designs and colors should be discouraged. The same housing color, design or treatment should not be used for any more than three adjacent dwellings;
 - (iii) Corner lot houses should be generally lower lying houses as height and mass is emphasized beside a void such as a road.
 - (iv) Any accessory building built on a lot, such as a detached garage or garden shed should be of proportional mass, roof line and treatment as the principal building.
 - (v) Developments should be encouraged to possess good proportion in the front elevations through the use of such elements as dormers, bay windows, shutters, brickwork, roof lines and variations of window sizes.

8.8 DEVELOPMENTS ON OR NEAR SLOPES

- (1) Notwithstanding the yard requirements prescribed in the land use districts, no permanent buildings shall be permitted within 20.0 m of the top of the bank of any waterbody and no development shall be permitted within 20.0 m of the top or bottom of an escarpment bank or slope where the grade exceeds 15% (fifteen percent).
- (2) The Development Authority may require greater setback than is prescribed in Section 8.8(1).

944/18

- (3) Notwithstanding that a proposed development conforms in all respects with this Bylaw, including Sections 8.8(1) and 8.8(2), where the application is for development on lands that are or may be subject to subsidence, the Development Authority shall not issue a development permit unless the applicant can demonstrate that preventative engineering and construction measures can be instituted to make the parcel suitable for the proposed development.

944/18

- (4) Subject to Section 8.8(3), the Development Authority may, at their discretion, reduce the setback requirements established pursuant to 8.8(1) and 8.8(2) if the applicant provides satisfactory proof of bank stability.

944/18

8.9 DEVELOPMENTS NEAR WATER

Such areas shall not be less than 4.25 m in width and not more than 3.0 m from the building, and no permanent structure or vehicular parking shall be permitted thereon.
